

MFO13000A1 Fiber Optic KEVLAR® Scissors

- Short cutting blade length with fine points lends to accurate cuts on intricate parts
- Best tool choice for fiber optic cable installers, fiber cable termination and repetitively cut Kevlar® strength fibers
- Single micro-serrated blade to grip material without slippage and produce clean cuts every time.
- Light weight and small size give more control for trimming and detailing.
- Sharp blades are made from high-carbon molybdenum and vanadium steel to ensure longevity
- Extended tang for durability and efficient force transfer
- Strong Nylon handles padded with TPR for comfort in use
- Also excellent for cutting aramid fabrics e.g. Dyneema®, Vectran®, Carbon fiber...
- Fits either hand
