

## MFO13004A1 Fiber Optc Cable Stripper-3 Holes

- Three-hole design efficiently removes 2 mm to 3 mm fiber jackets & buffers down to the 125 micron bare fiber in one compact tool.
  - 2~3mm fiber jackets
  - 900 tight buffers TO 250 micron buffer coating
  - Standard 250 TO 125 micron stripping
- All stripping notches are quality manufactured to precise tolerances to ensure clean, smooth strips with every use.
- Factory-set blade notches require no adjustment & will not scratch or nick the fiber
- Blades made from high carbon alloy steel with hard chrome plating to ensure longevity
- Compliant TPR handle grips are ergonomically designed to fit comfortably in either hand.
- Inspected by Auto Image dimension measuring system. QC label attached to each product
